

The future has a TouchMenù® before its eyes!

The innovative video communication system that connects businesses and clients in a smart, fast and efficient way, guaranteeing a positive return of image and optimizing the relationship between customer and business.

Experience >>

For more than 10 years our devices have been supporting commercial activities all around Italy.

Indoor and outdoor >>

Thanks to the weather-resistant monitors, our TouchMenù® is able to offer several indoor and outdoor solutions.

TouchMenù® provides a complete service to its clients: performing devices with an attractive design, innovative apps to digitalize commercial activities and customer support 24/7.

Attractive design >>

Modern and unique design to stand out and not to go unnoticed!

Multilingual >>

Your menus or contents are available in more than 14 languages, thanks to our special team of language experts. In addition, we offer you spectacular photos and graphics.

ELEGANT INNOVATION!

© 2015 TOUCH MENÙ

TouchMenù® was created to meet the needs of entrepreneurs and clients in a smart and digitalized way, giving them the chance to choose and be informed at 360 degrees about all products and services that a business offers.

We've installed more than 400 TouchMenù® in Italy and abroad. Each business has experienced on average an increase in turnover of 20% since the installation of the system.

Our skills: _____

Technology and innovation >>
Security and customer support 24/7 >>
Increase in turnover >>
Simplification of the relationships with customers >>

The goal of TouchMenù® is to optimize and digitalize business activities, allowing a functional and multimedia communication between owners and customers, guaranteeing them an unique experience.

All our devices have **1000 nit** high brightness monitors.

"Our customers believe in us, because they wait to open their new restaurant until they get the Touch Menù. Why shouldn't we believe in us?!"
(Carlo Baronti - Ceo & founder)
